

Hello,

I am very alarmed to hear of Sinclair Broadcast Group's recent plans to air partisan programming under the guise of news.

Our society has seen a great deal of dilution in the quality of broadcast news. The cross interests between large media companies like Sinclair and unbiased news can not help but hasten the decline.

As I understand it, these companies are using the public airways that you license to them. Please take steps to protect the quality of what is shown as news to be actually news worthy and not corporate propaganda!

Thank you.
